

Markus Luis Flores

Calgary, Alberta, Canada • 368-299-0497 • markuslflores@gmail.com

Software Developer with almost 6 years of experience developing, maintaining, and testing large-scale applications. Has a proven track record of writing clean and efficient code, and designing business-oriented software that caters to the needs of the user. Team player, good collaborator and can easily adjust to any role according to the team's needs.

Highlights

- Almost 6 years of software development experience building and testing enterprise Software as a Service (**SaaS**) products
- Knowledgeable with **AI** and automation tools such as **Claude Code**, **Claude API**, **GitHub Copilot**, **Cursor**, and **n8n**, including a **RAG** retrieval system built with **pgvector**
- Advanced knowledge in full-stack development using modern technologies such as **React.js**, **Next.js**, and **TypeScript**
- Strong familiarity with **SQL** and **NoSQL** databases: **MySQL**, **MSSQL**, **PostgreSQL**, **pgvector**, **MongoDB**, **Firebase**
- Experienced in version control tools such as **Git**, **GitHub**, **GitLab**, and **AccuRev**
- Experienced with **Test-Driven Development (TDD)** and test automation using **Playwright**, **Postman**, and internal tools along with model-based test design across **unit**, **integration**, **functional**, and **regression testing**
- Experienced with **CI/CD pipelines** and deployments using **GitHub Actions**, **UrbanCode Deploy**, and **OpenShift**
- Skilled in using project and defect tracking tools such as **Jira**, **qTest**, **Trello**, and **Confluence**
- Proven ability to collaborate with Developers, QA, and Business Analysts in an **Agile Scrum** environment

Experience

SDET – QUALITY ENGINEER

Royal Bank of Canada (RBC) | May 2025 – Present

- Design and develop **test automation** and tooling for the investment management and trading platform Charles River IMS.
- Build and maintain automated regression suites using **Playwright** and RBC's internal testing frameworks.
- Test API endpoints with **Postman** to confirm data accuracy and integration behavior.
- Author end-to-end and integration test cases with model-based design tools (**ConformIQ**, **Hexawise**), and generate cases from Jira requirements with GitHub Copilot.
- Manage test execution and defect triage in **Jira** and **qTest**, reporting status to stakeholders across **Agile** ceremonies.
- Deploy and validate QA environments on **Red Hat OpenShift** through **GitHub Actions** and **UrbanCode Deploy**.

SOFTWARE ENGINEER

Infor PSSC, Inc. | Dec 2018 – June 2023

- Designed and developed new features and enhancements for Infor's SaaS Human Capital Management (**HCM**) platform based on business requirements.
- Maintained and improved existing HCM modules using **Agile** and object-oriented programming (**OOP**) practices.
- Led code reviews through meetings, **Crucible**, and **GitLab**. Maintained release version code using **AccuRev** and **Git**.
- Authored functional and technical design documents, user documentation, and client knowledge transfer (**KT**) materials.
- Collaborated with Business Analysts and Product Owners to influence design decisions and deliver customer solutions.
- Supported QA teams by preparing detailed test cases, contributing to automation scripts, and ensuring coverage for functional and regression testing.

Skills

Frontend: HTML, CSS, Tailwind CSS, React.js, Next.js, JavaScript, TypeScript, Mantine

Backend: Java, PHP, Laravel, Node.js, SQL, NoSQL, pgvector, Supabase, LPL

DevOps: Docker, GitHub Actions, UrbanCode Deploy, Red Hat OpenShift, Railway

AI Tools: Claude Code, Claude API, RAG, GitHub Copilot, Cursor, n8n

Testing: Playwright, Vitest, Selenium, Postman, qTest, ConformIQ, Hexawise, BLT

Others: Git, RESTful API, Jira, Trello, Confluence, Agile Scrum Methodology, AccuRev

Soft Skills: Problem-solving, Detail-oriented, Critical thinking, Adaptability, Communication, Teamwork

Education

DIPLOMA IN SOFTWARE DEVELOPMENT

Southern Alberta Institute of Technology (SAIT) | Calgary, Alberta | Sept 2023 – April 2025

With Honours

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

De La Salle University | Manila, Philippines | May 2014 – August 2018

5x Dean's Lister

Projects

THE FOURTH OFFICIAL

July 2026 | Personal Project

Created a RAG-powered Q&A system over the IFAB Laws of the Game, combining pgvector similarity search and Postgres full-text search with Claude-generated answers and inline citations. Built an answer key of test questions and their correct passages, then tuned the search to find them more often and rank them higher (recall@8, MRR). Developed using **Next.js**, **Supabase**, **pgvector**, **Claude API**, **Vitest**, and **Railway**.

ORBIT INVENTORY MANAGEMENT SYSTEM

September 2024 – May 2025 | Capstone Project

Created an inventory management system for Wing Kei Care Centre. The system includes inventory tracking, approval, and reports based on user's access levels. Developed using **Next.js**, **React.js**, **TypeScript**, **Mantine**, **Firebase**, and **GitHub**.

INFOR CARPOOL PROJECT

February 2019 – May 2022 | Company Side Project

Created a mobile carpool booking application developed with Infor Community of Business Analysts. The project won Infor's Innovation Flight Central's Shark Tank competition and Habi Team of the Year in Infor's Sinagtala Awards.

Volunteer Experience

QUALITY ASSURANCE TESTER

Empowered Futures | June 2024 | Volunteer

- Performed end-to-end testing for the Empowered Futures Connect platform.
- Documented scenarios, steps to replicate, and test evidence on issues and concerns found during software testing.
- Provided feedback on the usability of the application for different roles and perspectives.
